

Large orders for Allweiler pump skids

(Radolfzell/Germany) In September 2007, the Pump Skid business segment of Allweiler AG received large orders from several global customers. Total value of the orders is in the double-digit million range. Allweiler AG of Germany manufactures ready-to-use fuel and lubricating-oil skids for gas and steam turbines in power plants. Its largest customer is Siemens AG.

Just three recent orders from Siemens AG total €5.5 million in value. For decades, Allweiler has been planning, producing, delivering, and installing complex auxiliary systems for power plants. These types of lubricating-oil, fuel, and purge-water skids are the core business of Allweiler AG's Pump Skid business segment. Stefan Kleinmann, Director of Pump Skids at Allweiler AG: "We expect additional large orders because energy needs are rising rapidly around the world and large numbers of power plants are being modernized or replaced."

Caption:

This Allweiler fuel skid is destined for a power plant in Moscow where it will pump fuel into the gas turbine's combustion chambers at a pressure of 80-90 bar. Allweiler high-pressure pumps, fuel filters, control valves, and safety valves are arranged on skids like these. The base frame also serves as a leak-oil tank.

Founded in 1860, Allweiler AG is the oldest German pump manufacturer and the European market and technology leader for centrifugal, propeller, screw, progressing-cavity, gearwheel, rotary lobe, macerators, and peristaltic pumps. Allweiler AG owns a foundry and produces ready-to-use fuel and lube-oil skids and rinsing-water facilities. Allweiler AG has its main German headquarters in Radolfzell on Lake Constance as well as a major production site in Bottrop, Germany. Since 1998, Allweiler AG has been part of Colfax Corp., a global leader among pump manufacturers.
