Allweiler Pumps Approved for Explosive Atmospheres. New ATEX Certificate for Dust.

(Radolfzell/Bottrop - Germany) For many years progressing cavity pumps, peristaltic pumps, and macerators manufactured by Allweiler AG have fulfilled the requirements for use in potentially explosive gaseous atmospheres when used properly. But now – since end 2008 – they are also certified for use in dust-laden explosive atmospheres.

The ATEX certificate confirms that Allweiler pumps now fully comply with EU directive 94/9/EC "Explosion Protection" when used in accordance with specifications. This directive requires proper documentation for all new installations and initial start-ups of equipment in areas with potentially explosive atmospheres.

Allweiler fulfilled the safety requirements for dust-laden, potentially explosive environments without any design changes. Their pump series have long been used in potentially explosive, gaseous atmospheres. Allweiler pumps are also equipped with monitoring devices. These measures immediately detect disturbances even in dusty atmospheres and avoid problems like dry running, overload conditions, and ultimately impermissible warming of the pump surface.

The EU directive likewise addresses both electrical and mechanical hazards associated with operating pumps in potentially explosive areas. As a result, it is not adequate to simply power a pump unit with a motor certified according to the Ex directive. The mechanical part of the machine must also have documented ignition protection. Specifically, the pump unit may not reach the ignition temperature of the potentially explosive atmosphere, whether during operation or disturbance or due to excessive wear or mechanical failure.

Progressing cavity pumps, peristaltic pumps, and macerators produced by Allweiler meet precisely these requirements. This is particularly true of equipment group II, categories "2" and "3" of the directive, i.e. for use in frequently explosive and briefly explosive gaseous or dust-laden atmospheres (zones 1, 21, 2, and 22). Unlike gaseous atmospheres, dusty atmospheres are not associated with temperature class limitations.

Press Release
February 18, 2009

ABOUT ALLWEILER AG – Founded in 1860, Allweiler AG is the oldest German pump manufacturer and the European market and technology leader for centrifugal, propeller, screw, progressing-cavity, cogwheel, rotary lobe, macerators, and peristaltic pumps. Allweiler AG owns a foundry and produces ready-to-use fuel and lube-oil skids and rinsing-water facilities. Allweiler AG has its main German headquarters in Radolfzell on Lake Constance as well as a major production site in Bottrop, Germany. Since 1998, Allweiler AG has been part of Colfax Corporation.

ABOUT COLFAX CORPORATION – Colfax Corporation is a global leader in critical fluid-handling solutions, including the manufacture of positive displacement industrial pumps and valves used in global oil & gas, power generation, marine, naval and a variety of other industrial applications. Key product brands include, Allweiler, Fairmount Automation, Houttuin, Imo, LSC, Portland Valve, Tushaco, Warren and Zenith. Colfax is traded on the NYSE under the ticker "CFX." Additional information about Colfax's products, businesses and practices is available at www.colfaxcorp.com.

CAUTIONARY NOTE CONCERNING FORWARD LOOKING STATEMENTS:

This press release may contain forward-looking statements, including forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements include, but are not limited to, statements concerning Colfax's plans, objectives, expectations and intentions and other statements that are not historical or current facts. Forward-looking statements are based on Colfax's current expectations and involve risks and uncertainties that could cause actual results to differ materially from those expressed or implied in such forward-looking statements. Factors that could cause Colfax's results to differ materially from current expectations include, but are not limited to factors detailed in Colfax's Registration Statement on Form S-1 under the caption "Risk Factors" and other reports filed with the U.S. Securities and Exchange Commission. In addition, these statements are based on a number of assumptions that are subject to change. This press release speaks only as of this date. Colfax disclaims any duty to update the information herein.
