

Allweiler Turns 150 – Earning Leadership One Customer at a Time

(Radolfzell/Germany) Allweiler AG, a Colfax business unit, is Germany's oldest pump manufacturer. Year 2010 marks 150 years that Allweiler has been manufacturing pumps. The company celebrated its anniversary on September 25 with a reception and an open house day for employees and their family members.

Approximately 1800 visitors took advantage of this opportunity.

According to executive board member Frank Kirchner, the dedication and loyalty demonstrated by Allweiler employees have been essential factors in the company's success. A culture of customer orientation and continuous innovation are also very important. "For decades, our complete product line has enabled us to offer our customers cutting-edge solutions from a single source. As we move forward, we will focus on solutions capable of safely pumping any liquid with the lowest possible total cost for the customer," according to Mr. Kirchner. Allweiler AG already offers intelligent leak detection and collection systems as well as integrated electronic control and monitoring systems for all types of pumps. Mr. Kirchner continues: "Our development goes beyond conventional mechanical engineering into the realm of integrated mechatronic systems."

Vice-President of the regional Chamber of Industry and Commerce (IHK) Thomas Conrady presented Allweiler with a certificate in honor of its long-term success. The managing director of the Federation of German Industries (BDI) also paid tribute to the company with a cast Barbara figure, the patron saint of foundrymen. Since its founding, Allweiler AG has been one of only a few German pump manufacturers to own its own foundry.

This gives Allweiler the ability to fulfill unusual requests for special materials or casing shapes at short notice without sacrificing quality. Having in-house stator production for progressing cavity pumps ensures use of the best materials for extremely long service life and low costs.

Allweiler's long history began in 1860 with fire fighting pumps. At the time, Allweiler was the only manufacturer specializing in these important products in the Lake Constance region. Since then, the company has continuously expanded its product line and geographic reach. Today, each year Allweiler sells more than 100,000 pumps for virtually any application and liquid through about 100 resellers and distributors around the world. Allweiler has been a business unit of the American Colfax Corporation since 1998. Products from its sister companies complement screw, centrifugal, and propeller pumps manufactured in Radolfzell as well as progressing cavity pumps and macerators produced in Bottrop.

For decades, Allweiler's products have made it a market and technology leader in Europe.

Allweiler's in-house plant engineering services also deliver turnkey fuel, lube-oil, and purge-water skids for all types of power plants. According to Mr. Kirchner: "Our single-source philosophy - one contact for every liquid and every solution - will continue to define our company. When coupled with the low energy costs and highly refined customer orientation, we feel well prepared for the future."

About Allweiler – Allweiler AG is the oldest German pump manufacturer and the European market and technology leader for macerators and centrifugal, propeller, screw, progressing cavity, cogwheel, rotary lobe and peristaltic pumps. Headquartered in Radolfzell and with locations in Bottrop and Gottmadingen, Allweiler owns a foundry, produces its own stators, and manufactures ready-to-use fuel and lube oil skids and rinsing-water facilities for commercial marine, oil & gas, chemical processing, specialty chemical, and waste and wastewater applications.

ABOUT COLFAX CORPORATION – Colfax Corporation is a global leader in critical fluid-handling products and technologies. Through its global operating subsidiaries, Colfax manufactures positive displacement industrial pumps and valves used in oil & gas, power generation, commercial marine, defense and general industrial markets. Colfax's operating subsidiaries supply products under the well-known brands Allweiler, Baric, Fairmount Automation, Houttuin, Imo, LSC, Portland Valve, Tushaco, Warren and Zenith. Colfax is traded on the NYSE under the ticker "CFX." Additional information about Colfax is available at www.colfaxcorp.com.

CAUTIONARY NOTE CONCERNING FORWARD LOOKING STATEMENTS:

This press release may contain forward-looking statements, including forward-looking statements within the meaning of the U.S. Private Securities Litigation Reform Act of 1995. Such forward-looking statements include, but are not limited to, statements concerning Colfax's plans, objectives, expectations and intentions and other statements that are not historical or current facts. Forward-looking statements are based on Colfax's current expectations and involve risks and uncertainties that could cause actual results to differ materially from those expressed or implied in such forward-looking statements. Factors that could cause Colfax's results to differ materially from current expectations include, but are not limited to factors detailed in Colfax's reports filed with the U.S. Securities and Exchange Commission as well as its Annual Report on Form 10-K under the caption "Risk Factors". In addition, these statements are based on a number of assumptions that are subject to change. This press release speaks only as of this date. Colfax disclaims any duty to update the information herein.

The term "Colfax" in reference to the activities described in this press release may mean one or more of Colfax's global operating subsidiaries and/or their internal business divisions and does not necessarily indicate activities engaged in by Colfax Corporation.
